## Overview

---

Highjoule's site energy solution is designed to deliver stable and reliable power for telecom base stations in off-grid or weak-grid areas. By combining solar, wind, battery storage, and diesel backup, the system ensures 24/7 uninterrupted operation. Users can use the energy storage system to discharge during load peak periods and charge from the grid during low load periods, reducing peak load demand and saving electricity. With the relentless global expansion of 5G networks and the increasing demand for data, communication base stations face unprecedented challenges in ensuring uninterrupted power supply and managing operational costs. 45V output meets RRU equipment. Highjoule powers off-grid base stations with smart, stable, and green energy. These batteries store energy.
