

Border post solar energy storage system

Overview

A hybrid solar-plus-storage project developed by Enel North America, combining a 297 MW DC solar photovoltaic (PV) array with an 86 MW battery energy storage system (BESS). Enel North America on Wednesday announced the start-up of its Fence Post solar plus storage project in Texas together with a 22-MW virtual power purchase agreement (VPPA) with off-road vehicle maker Polaris Inc (NYSE:PII). A win-win for clean energy! Enel North America has completed its 297-MW Fence Post solar + storage project in Texas, which includes a 86-MW storage. Enel North America and Polaris have started operations at Enel's Fence Post Solar+Storage project, a 297 MW PV and 86 MW storage system installation located in Navarro County, Texas. The project is supported by a 12-year VPPA.

Border post solar energy storage system

Enel switches on solar-plus-storage project in Texas, signs 22-MW PPA

Enel North America on Wednesday announced the start-up of its Fence Post solar plus storage project in Texas together with a 22-MW virtual power purchase agreement (VPPA) with off ...

Enel's Fence Post: Texas Solar + Storage Success

Located in Navarro County, Texas, the project will help Polaris reduce greenhouse gas emissions and add renewable electricity to its energy portfolio, contributing to a more sustainable future.

Polaris Signs VPPA with Enel for Fence Post Solar+Storage

Enel North America and Polaris have started operations at Enel's Fence Post Solar+Storage project, a 297 MW PV and 86 MW storage system installation located in Navarro ...

Nearly 800 MW of solar bound for the Texas grid

The Fence Post solar + storage project, developed by Enel North America, will soon bring 297 MW of solar coupled with storage to the Texas grid. The solar portion of the Fence Post ...

Enel North America starts 297MW Texas solar-plus-storage project

In September last year it signed a PPA with Boston Properties (BXP) for a 202MW/104MW solar-plus-storage site in the state. BXP will offtake 21MW of the power output form ...

Texas Solar + Storage Success - Furtivum

Enel North America has completed its 297-MW Fence Post solar + storage project in Texas, which includes a 86-MW storage system. The project is supported by a 12-year, 22-MW virtual power ...

Enel North America Launches Fence Post Solar Project in Texas

Situated in Navarro County, the Fence Post project comprises 297 megawatts (MW) DC of solar capacity, which came online in December 2023, and an 86-MW storage system, currently ...

Enel starts operating solar project supported by Polaris deal

The solar project began operations in December of 2023, while the battery storage system is complete and undergoing final commissioning. Coho Climate Advisors advised Polaris on this VPPA and ...

Enel completes 297-MW Texas solar + storage project

Enel North America started operations of its 297-MW Fence Post solar + storage project in Texas in December. The project is supported by a 12-year, 22-MW virtual power purchase ...

Fence Post Solar Hybrid Project

This innovative facility directly addresses the challenge of solar intermittency by co-locating generation with substantial battery storage, creating a reliable resource capable of supplying power day and night.
