

Can k75t60 use an inverter

Overview

The K75T60 is suitable for various high-voltage switching applications, including power supplies, motor control, inverters, uninterruptible power supplies (UPS), and other power electronic systems. K75T60 IGBT 600V 75A For Solar Inverter is an Insulated Gate Bipolar Transistor manufactured by Infineon Technologies normally used in solar inverters. Price and other details may vary based on product size and color. Need help?

. The K75T60 is a high-performance N-Channel IGBT designed for use in high-power switching applications. Just because of the fast recovery, the switching speed is too fast. We specialized in designing, developing and manufacturing of IC, Diodes, Transistors, SCR, Mosfet, IGBT, Regulators with our own brand (JDP). Besides, we are internationally renown.

K75T60 IGBT 600V 75A For Solar Inverter

K75T60 IGBT 600V 75A For Solar Inverter is an Insulated Gate Bipolar Transistor manufactured by Infineon Technologies normally used in solar inverters.

K75T60 IGBT Fast Recovery Anti-Parallel Diode (75T60 used in ...

K75T60 is an IGBT fast recovery Anti-parallel diode, a switching device mainly used in switching applications. Its recovery time is too fast. Just because of the fast recovery, the switching speed is ...

- Voltage range: 691.2-947.2V
- >6000 cycles (100%DOD)
- Rated battery capacity: 216KWH (customizable)
- EMS communication: 4G/CAN/RS485
