

# Cote d Ivoire home solar power generation system

## Overview

---

Launched in June 2023, the plant comprises 68,000 solar panels on 36 hectares, with the aim of doubling this figure by the end of 2024 to reach a capacity of 80 MWp. The project, costing a total of 75.6 million euros, is financed by Côte d'Ivoire, a German loan and a grant. Côte d'Ivoire recently celebrated the launch of a significant renewable energy milestone with the inauguration of a new solar power plant in Boundiali, located in the northern part of the country. Discover actionable insights for businesses and investors looking to tap into this growing market. It is part of a series of briefing notes that provide a high-level overview of the status of countries' off-grid solar markets according to the information gathered from GOGLA members, as well as relevant policies and programs<sup>1</sup>. The plants will bring clean, reliable electricity to more than 1 million people. The Republic of Côte d'Ivoire plans to build 12 photovoltaic solar plants with a combined capacity of 678 MW across the country by 2030, and aims to reach a total capacity of 1,686 MW by 2040. In the vast landscape of West Africa.
