

Cyprus hybrid compression energy storage project

Overview

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is planning to install a 59 MW facility with a capacity of 120 MWh. This comes after reaching a funding agreement with the EU of 40 million euros. The Mediterranean island country's Ministry of Energy, Commerce and Industry announced last week (14 November) that the government Council of Ministers had. The Council of Ministers, the executive branch of the Cypriot government, has approved the nation's funding plan for energy storage systems installed in conjunction with renewable energy plants which had been implemented under earlier support plans, as well as self-consumption facilities included.

Applications

Cyprus Approves Big Battery Energy Storage System Project

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is ...

Cyprus approves its first energy storage subsidy scheme

The approval of the support scheme follows the public consultation and the General Policy Framework for Energy Storage, which were completed in October 2024 and July 2023 ...

AID SCHEME FOR INSTALLATION OF ENERGY STORAGE ...

The operating aid will be granted to new renewable energy and storage hybrid projects until 1.1.2030 or can be extended up to 10 years until the interconnector is operational.

Green light for one of first standalone battery investments in Cyprus

The Cypriot Department of Environment has approved the project for what is set to become one of the country's first battery energy storage systems. HESS Hybrid Energy Storage ...

The largest energy storage centre in Cyprus will be built in Larnaca

The Cyprus Department of the Environment has approved the construction and operation of a modern energy storage facility with a capacity of 59 MW and a storage capacity of 120 MWh in the Psevdás ...

Cyprus confirms EUR35 million 'investment

MECI said at least EUR40 million would be available for centralised energy storage system (ESS) projects. The framework also launched a consultation into how best to direct the scheme to ...

A modern energy storage facility will be built in Larnaca for EUR22

The Environmental Authority of Cyprus has approved a project for the construction of an energy storage facility in the village of Psevdas (Larnaca district). The new complex will have a ...

Cyprus Sets Out Plans for Hybrid Energy Storage System

Cyprus has announced plans this week for the integration of its energy storage systems (ESS) with renewable energy sources. This comes after reaching a funding agreement with the EU of 40 million ...

Cyprus to deploy renewable energy storage systems starting in 2026

The planned battery storage infrastructure, to be installed between 2026 and 2030, will have a total capacity of 160 megawatts with the capability to store renewable energy for 2-3 hours, ...
