

# Domestic solar power generation owners group

## Overview

---

These programs enable a group of participants to pool their purchasing power to buy solar into a solar system at a level that fits their needs and budget. The system can be on- or off-site and may be owned by utilities, a solar developer, non-profit entities, or multiple. It allows homeowners, small building owners, installers, and manufacturers to easily develop estimates of the performance of potential PV installations, and can even compare solar's cost to utility bills. If we don't have an active program in your area, we can also help you go solar on. This slide deck provides an overview of community solar. 7 gigawatts (GW) of new capacity in Q3 2025, marking the industry's third-largest quarter on record and pushing total. Enjoy an effortless and affordable solar experience with the Sunrun Subscription Plan With 1 million homes and counting, no one has more installation expertise. An ecosystem of innovative products that put you in control of your home energy needs. Tailored plans including predictable monthly. In distributed solar applications, small PV systems (5-25 kilowatts [kW]) generate electricity for on-site consumption and interconnect with low-voltage transformers on the electric utility system. Who is driving growth in the solar photovoltaic industry?

Various actors, from key businesses to state.
