

EU Energy Storage Projects

EU Energy Storage Projects

EU Battery Storage Market Review 2025

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

European Energy inaugurates Northern Europe's largest combined ...

The project demonstrates European Energy's approach to enhancing asset value through storage integration and flexible system operation. The battery enables electricity generated during ...

New EU Platform Highlights Over 1771 Energy Storage Projects

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy ...

Energy storage remains 'significantly underutilised' in EU

The report, 'Overview of Energy Storage Deployment in Europe,' details the accelerating growth of adoption across a variety of technologies, including mechanical pumped hydro and ...

2025: EU Adds Record 27.1 GWh Of Battery Storage, Led by Utility ...

The EU installed 27.1 GWh of new battery storage capacity in 2025, a new record year powered by strong utility-scale deployment, according to SolarPower Europe.

Spain secures major EU grant for 1 GW pumped storage project

The EU is investing EUR650 million in cross-border energy infrastructure. The largest single grant has been awarded to the Aguayo II pumped-storage hydroelectric project, which will expand ...

The European Energy Storage

Inventory: A ...

This innovative tool systematically catalogizes all energy storage projects within Europe, from the first planning phase to operational operation.

Energy storage

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

14 GW of energy storage capacity under construction in Europe

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European ...

EU invests EUR650m in cross-border hydrogen and power grid projects

Spain is the EU member state receiving the most funding for cross-border electricity projects, while Germany is emerging as the frontrunner in hydrogen initiatives. Meanwhile, the ...
