

Energy independence rome

Overview

[Updated on Ma] After nearly 40 years of prohibition, Rome is taking steps to return to nuclear energy. The Italian government aims to pass a law establishing a framework for reviving civilian nuclear power. The goal: to strengthen the country's energy security, diversify its electricity. Rome has signified a decade-long policy reversal eyeing advanced reactors Italy was a pioneer of nuclear power and had four commercial nuclear plants, but all were shut down after the Chernobyl disaster in 1986.
