

# Georgia Solar Systems Engineering

## Overview

---

Pure Power Engineering is an Engineer of Record (EOR) for Georgia commercial, industrial and utility-scale solar + storage projects. We bring unmatched proximity and insight into the state's regulatory environment, utility requirements, and AHJ expectations. Located at the Georgia Institute of Technology, the Solar Fuels and Technologies Lab (Solar FTL) studies technical processes and fundamental science that make solar energy more accessible and more versatile. We research thermochemical processes using concentrated sunlight, and we develop cycles for. United Renewable Energy<sup>®</sup> LLC is a privately held engineering, procurement, and construction (EPC) firm developing photovoltaic farms and energy storage systems for utilities, industrial and commercial companies, Independent Power Producers, and Electrical Membership Cooperatives. Clients retain our services for: Headquartered in Atlanta, Georgia and comprised of Certified Solar Photovoltaic Installers. A historic estate along the Georgia coast that traces its roots back more than three centuries may soon provide a look at solar energy's potential to meet the world's growing demand for power. A team of students from the University of Georgia College of Engineering is working to help the UGA Center.

### Solar Power , Georgia Power Energy Sources

We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located ...

## Georgia Solar + Storage Engineering Firm , C& I And Utility-Scale ...

Pure Power Engineering is an Engineer of Record (EOR) for Georgia commercial, industrial and utility-scale solar + storage projects. We bring unmatched proximity and insight into the state's regulatory ...

## UGA Engineering students design solar power system for historic site

The UGA engineering students are working with Wormsloe to design a demonstration solar power installation that will allow visitors to see a working renewable energy system.

## Sustainable Electrical Energy (PMSEE)

Courses are organized in a sequential manner to cover in a comprehensive way the engineering content and industry emerging technologies in sustainable electrical energy.

## Solar Fuels and Technologies Lab

We research thermochemical processes

using concentrated sunlight, and we develop cycles for the production of solar electricity, solar-processed materials, and solar fuels.
