

Iran electric vehicle range

Overview

Discover the latest electric car prices, detailed specifications, and key features of leading EV brands and models in Iran at Motowheeler. Currently, there are about 27 million electric cars on the world's roads, and their electricity consumption is about 110 to 120 terawatt hours per year (TWh/yr). Both the European and Asian markets are now hotbeds of innovation in terms of EVs, with the Renault 5-Etech (pictured above), (remember “PK”), being voted the top car in. The regulation for the import of electric, hybrid, and extended range vehicles provides a comprehensive framework for the development of sustainable transportation in Iran.
