

# Is it good to install photovoltaic panels in the sun

## Overview

---

While solar panels perform best under direct sunlight, they can still produce solar energy in the shade, during cloudy weather, in the rain, and while it snows. The impact of shade can be mitigated by using half-cell solar panels and MLPE (microinverters and power optimizers). Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in.
