

Is it necessary to invest in photovoltaic panels

Overview

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. Energy Information. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. But new federal legislation has accelerated the expiration of the 30% tax credit for homeowner-owned solar systems, moving. Home solar panel setups use photovoltaics (PV), a technology used to convert sunlight into electricity. Solar energy is gained from the sun and then extracted through the usage of photovoltaic cells. This turns sunlight into.
