

# Market prospects for artificial solar power generation

## Overview

---

The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436. Global solar installations reached nearly 600 GW – an impressive 33% increase over the previous year – setting yet another record. Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's. • China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. • At the end of 2024, global CSP. Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar installations set to rise to 914 Gigawatts (Gw) in 2030, 57% above 2024 levels.

## Market prospects for artificial solar power generation

### Spring 2025 Solar Industry Update

o At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing percentage of the U.S. electric generation mix. o In 2024, solar represented ...

### Comprehensive Review of Artificial Intelligence Based Solar Power

In an era characterized by a growing commitment to sustainable energy solutions, this extensive review provides an in-depth investigation of artificial intellig

### Solar Power Market Size, Share, Trends , Growth Report [2032]

The global solar power market is projected to grow from \$253.69 billion in 2023 to \$436.36 billion by 2032, at a CAGR of 6% in the forecast period

## The Future of Solar Energy: Solar Energy Trends ...

Explore the future of solar in 2025--key trends, new tech, and policies driving global clean energy growth.

## Solar Market Insight Report Q4 2025

From 2025-2030, our base case outlook puts total solar deployments at 246 GWdc - virtually unchanged from our Q3 2025 outlook.

## Global Market Outlook for Solar Power 2025-2029

With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling behind, ...

## Solar Power Market Outlook (2025-2035): Trends, Innovations, and ...

Discover comprehensive insights into the global solar power market, including

photovoltaic and thermal technologies, key players, pricing trends, sustainability impact, and market ...

## Advancements in solar technology, markets, and investments - A ...

The World Solar Markets report provides an overview of the current solar market and how the market is forecasted to grow. It also touches upon the various key barriers that the market faces ...

## The Future of Solar Energy: Growth and Innovation in the Photovoltaic

In 2024, the utility sector dominated the solar photovoltaic (PV) market, with numerous large-scale solar projects under development worldwide. These utility-scale projects are critical to ...

## The Outlook for Global Solar Energy Continues to Be Bright

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...
