

Namibia electricity safety

Overview

This Code governs the minimum safety standards for the operating, maintenance, construction and installation of power systems in Namibia. Recent statistics paint a worrying picture, with NORED accounting for 41% of all reported industry incidents. The Electricity Control Board has announced that it will ensure that NORED fully implements the National Electricity Code. This follows a number of fatalities that took place in the northern parts of the country, prompting the Electricity Control Board to lay down guidelines for regional. nd 00 w me Am to 0 . Electricity Control Board (ECB) CEO, Robert Kahimise, recently criticized the northern Namibia regional Electricity Distributor (Nored) over electrocution incidents, some resulting in fatalities.
