Overview

At Nepal Solar Farm Limited, we are dedicated to facilitating faster adoption of renewable energy technologies across Nepal with an end goal of global sustainability. As of 4 March 2025, Nepal's total installed electricity capacity is 3421.41 MW from thermal, and 6 MW from Co-generation. • Solar power stations • 10. Tender [7 Jan 2026] Pokhara Birauta 132/11 KV Trans. Reduce Carbon Emissions! South Korea to Convert 1.18 Million Tons of Livestock Manure into Solid Fuel for Power Generation by 2030 [14 January] We are a professional energy information platform in Nepal, providing information on energy products. Pumped storage represents a low-cost energy storage alternative to options like batteries and hydrogen that are already readily available in the country. The project was carried out in close collaboration with the German Corporation for International Cooperation (GIZ) and the Ethiopian-based company Green Scene Energy. This pioneering project is set to transform industrial energy use by replacing polluting diesel generators with a large-scale battery storage system powered by solar energy. The Yeongdong PSH Plant, with a total capacity of 500 MW (250 MW x 2 units), is scheduled to be built in Yeongdong County.
