

# Power uninterruptible power supply switching module

## Overview

---

A modular UPS (uninterruptible power supply) is designed in a way that some of its critical functions are built in modules. The most typical modular functions are power module, intelligence module, and static bypass module. By using modular design, a UPS offers benefits that may include increased. Our switch mode power supplies meet all of these product requirements while ensuring that your business remains both efficient and competitive. The compact DURAmx DC UPS fits into tightest spaces in control cabinets in various industries. Our buffer module is a practical way of being well-equipped. Uninterruptible Power Supply (UPS) devices are the key players to sustain power quality and power security.
