

Proposed wind solar and energy storage projects in Australia

Overview

Australia's latest CIS Tender 4 has delivered a landmark set of 20 clean energy projects, totaling to a massive 6.6 GW of renewable capacity and 11. These are spread across states, balancing solar, wind, battery and hybrid designs. The tender also signals that hybrid solar. The Australian Government is working with states and territories to upgrade our electricity infrastructure and networks to ensure Australia maintains a reliable power supply while lowering energy prices. Across Australia, renewable energy planning and approval frameworks play a critically important. Australia's energy storage market is undergoing a dramatic transformation. In the first quarter of 2025 alone, over AUD 2.4%, followed by rooftop solar (12. Credit: Nordic Studio/Shutterstock.

Proposed wind solar and energy storage projects in Australia

National Renewable Energy Priority List

We have collaborated with states and territories to create the National Renewable Energy Priority List (Priority List), which will provide coordinated support for regulatory planning and ...

Top 7 Upcoming Battery Energy Storage System ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

The Inaugural National Renewable Energy Priority Project List

Together with states and territories, the Government considered generation, storage and transmission projects across Australia. The resulting list delivers five renewable and storage projects ...

Australia fast-tracks over 22 GW of renewable power and storage projects

The list includes 32 projects of renewable energy generation and storage, as well as 24 transmission projects of national significance that will benefit from a streamlined assessment and ...

Clean Energy Council , The Clean Energy Industry Snapshot , Clean

Here we provide a snapshot of renewable energy projects that are under development around the country which will soon be feeding clean, low-cost energy into the Australian electricity market.

19 Australian renewables projects add 6.4GW to electricity market

Australia's renewable energy sector is set for significant growth with the announcement of 19 new projects under the Capacity Investment Scheme (CIS) Tender 1. The projects will ...

6GW of energy storage included in Australia's

inaugural Priority List

The list, created through collaboration with the federal government and its states and territories, aims to provide coordinated support for regulatory planning and environmental approval ...

The 20 Solar, Wind and Battery Projects Approved by Australia in ...

Australia's latest CIS Tender 4 has delivered a landmark set of 20 clean energy projects, totaling to a massive 6.6 GW of renewable capacity and 11.4 GWh of battery storage. These are ...

10 renewable energy projects in Australia across solar, wind

Discover 10 major renewable energy projects in Australia, including wind, solar and battery storage, and the job opportunities shaping the clean energy sector.

10 renewable energy projects in Australia across solar, wind

Australia's renewable energy sector is

set for significant growth with the announcement of 19 new projects under the Capacity ...

Top 5 Renewable Energy Projects to Watch in 2025

As we move into 2025, several groundbreaking projects are poised to redefine how energy is sourced, delivered, and consumed. This article explores five standout renewable energy projects in Australia ...
