

# Prospects of new energy storage power generation industry

## Overview

---

Short-term headwinds will drive modest contractions in 2026–2027, yet Wood Mackenzie's latest forecast projects nearly 93 GW of new storage through 2029, cementing energy storage as a key component of America's affordable, reliable grid. Each quarter, new industry data is compiled into this report to provide the most comprehensive, timely analysis of energy storage in the US. All forecasts are from Wood Mackenzie Power & Renewables; ACP does not predict future pricing, costs or deployments. Media inquiries should be directed to. Delivered quarterly, the US Energy Storage Monitor from the American Clean Power Association (ACP) and Wood Mackenzie Power & Renewables provides the clean power industry with exclusive insights through comprehensive research on energy storage markets, deployments, policies, regulations and. Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. Annual deployments are also set to scale in Germany, the UK, Australia, Canada, Saudi Arabia and Sub-Saharan Africa, driven. The global energy storage industry is growing steadily, fuelled by the world's transition to clean energy. Modern energy storage solutions have become the cornerstone of renewable energy adoption.

## Prospects of new energy storage power generation industry

---

### Energy Storage Market Size, Growth, Share & Industry Trends

By technology, batteries held 53.84% of the energy storage market share in 2025, while hydrogen-based storage is poised for a 38.50% CAGR through 2031. By connectivity, on-grid ...

---

### Top 10 Energy Storage Trends & Innovations , StartUs Insights

Key trends include advancements in lithium-ion and solid-state batteries, hybrid energy storage systems, long-duration storage solutions, smart grid integration, and the rise of virtual power ...

---

### US Energy Storage Monitor

The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

## Energy Storage and Battery Material Demand Trends , Argus Media

The global energy storage industry is growing steadily, fuelled by the world's transition to clean energy. This is expected to drive up long-term demand for metals that are essential for energy

...

## Future of energy storage: 7 Powerful Trends in 2025

In 2023 alone, global battery storage additions reached 42 GW--more than double the previous year's installations. Looking ahead, experts predict 80 GW of new additions in 2025, ...

## Global Energy Storage Boom: Three Things to Know

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

## Energy Storage Rides a Wave of Growth but Uncertainty Looms: ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

## U.S. Energy Storage Monitor , ACP

US energy storage installations reached new heights with 5.3 GW installed and positive five-year growth projections. Delivered quarterly, the US Energy Storage Monitor from the American ...

## New Energy Storage 2024: Key Trends, Applications, and Market ...

Meta Description: Explore the latest advancements in new energy storage systems, including market growth data, renewable integration strategies, and emerging technologies shaping sustainable ...

## Recent advancement in energy storage technologies and their

As a result of a comprehensive analysis, this report identifies gaps and proposes strategies to address them. Researchers, industry experts, and policymakers will benefit from the findings of ...

## **U.S. Energy Storage Monitor , ACP**

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.
