

# Ranking of the best places for solar power generation

## Overview

---

The top five countries are China, United States, India, Japan, and Germany, based on solar power generation and installed capacity. California is the best state overall for solar energy, while West Virginia is the worst. If you're looking to install solar panels on. Nearly every country in the world has the right combination of geographic conditions, weather, and sunlight to generate all the electricity it needs —and more—using solar power facilities placed within its own borders. Though, looking through the Snapshot of Global PV Markets report from the International Energy Agency's Photovoltaic Power Systems Program (IEA PVPS), a few other charts stood out to me at least as much as the ones showing China's dominance — and China's not even close to the top of those.

## Ranking of the best places for solar power generation

---

### Solar Power by Country 2026

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

### Top Solar Power Countries in 2025: Leading the Global ...

Emerging leaders include Brazil, Australia, and Spain, each advancing solar rapidly through innovative policies and investment.

### 12.8V 100Ah

### Solar State By State - SEIA

With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and energy storage projects in the ...

### Best Places for Solar Energy Map

Solar energy is booming, and finding the best places for solar installations is crucial for maximizing its potential. In this article, we explore the top locations for solar energy development in ...

## Ranked: Best And Worst States For Solar - Forbes Home

We've rounded up the best and worst states for solar energy to give you an idea of solar energy trends across the U.S.

## Country Rankings

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

## The Best Solar Power Countries in the World Will Shock You

In terms of cumulatively installed solar power capacity in 2024, the best solar

PV market in the world was the Netherlands, with Australia and Germany getting silver and bronze.

## Solar Energy Generation by State Report February 2026

The following table ranks the best and worst states for solar energy production (shown in thousand megawatt-hours) in October and November, number 1 represents the best state for solar ...

## The top global solar power potential hotspots , Reuters

When ranked in terms of this potential output, some nations that currently do not even register on lists of major solar power producers come out on top, while several countries that currently

## The 11 Best and 6 Worst States for Solar

These rankings highlight the dynamic landscape of solar energy development across the United States, with each state

implementing a combination of policies and incentives to drive solar ...

## Solar Power by Country 2026

Data and analysis including a list of solar power in every country in ...
