

Rooftop photovoltaic hoisting bracket

Overview

Metal roof mounting brackets, including the popular L-foot system, provide a secure and reliable method of attaching solar panels to metal roofing surfaces. These brackets are designed to be compatible with various metal roofing styles, including standing seam and corrugated metal. Roof mounts are the more common category of PV mounts, suitable for direct installation on rooftops or separate racking frameworks. The type and size of the roof dictate the use of different mounting systems, which encompass clamps, ballasts, or rail systems.
