

# Samoa Solar Lighting System Installation

## Overview

---

Due to the numerous power outages during the first half of 2025 in Samoa, we thought it would be best to begin investing in some solar lights. This was because during those dark times the entire front yard was often pitch black and we could not see past our house and people. Application: Public areas including streets in front of City Hall, bridges, parks, and sports fields; remote monitoring with LoRa IoT system for maintenance It is an UNDP aid project in Samoa. more Audio. Samoa, a picturesque island nation nestled in the South Pacific, is renowned for its stunning natural beauty and vibrant culture. In a bid to illuminate the streets and enhance. Nestled within the Ministry of Natural Resources and Environment, the Renewable Energy Division (RED) is at the forefront of shaping Samoa's environmental landscape towards a low-carbon economy. Established in 2007, RED has emerged as a beacon of change among the 15 dynamic divisions. The base area is  $8360\text{m}^2$ , the office building area is  $3193.6\text{m}^2$ , with 3 floors above ground and a height of 18.
