

# Solar one-way grid-connected inverter

## Overview

---

On-grid solar inverters are connected to the electricity grid. It appears to be an ideal solution to many power-plant systems and solar power stations. Below shows how the ACDCX Asymmetric Inverter can be used with a sub-panel to power other 240v loads, and/or how it can be used along with an optional grid-tied PV system. Max sub-panel loading is 20 amps. We do offer variants that will enable homeowners and commercial system owners to benefit from remote app monitoring and future upgrade possibilities with end-to-end operation and maintenance support.
