

Solar panels laid flat

Overview

Solar panels shouldn't be laid flat. Most sloped roofs are in this angle range, which makes for an easy installation. But then, can they work perfectly well with a solar panel, or must you build a slanting structure on top of your roof?

Well, that is the essence of this article. Solar panels are a remarkable technology that has transformed the way we harness energy from the sun. As the demand for renewable energy increases globally, more people are considering solar power for residential, commercial, and industrial use. Flat roofs have a minimal slope allowance that will accommodate solar PV panel systems.
