

Solar power generation made by experts

Overview

Below, you can find resources and information on the basics of solar radiation, photovoltaic and concentrating solar-thermal power technologies, electrical grid systems integration, and the non-hardware aspects (soft costs) of solar energy. Solar technology has come a long way since New York inventor Charles Fritts created the first solar cell in 1883. His device wasn't very efficient - it was only capable of turning a tiny amount of the sunshine it absorbed into electricity, about 1% to 2%. Today's solar cells - which are typically. As independent experts we are your partner for profitable photovoltaic projects. These photons contain varying amounts of.
