Overview

A solar land lease is a long-term agreement between a landowner and a solar energy developer, allowing the developer to install and operate solar panels on the landowner's property. In return, the landowner receives lease payments, typically structured on a per-acre basis. If you're curious if your land could be suitable for a solar farm lease, get a free LandApp property report! LandApp's free property reports provide you with a solar lease payment estimate for your property along with additional data points about your property's unique features that could affect. Leasing land for solar energy projects is an increasingly attractive option for landowners looking to generate income while promoting renewable energy. This is not just a trend; it's a financial decision that can significantly impact your long-term wealth.
