

Solar power generation prices in Guinea

Overview

The annual average energy generation per unit of installed photovoltaic (PV) capacity in Guinea is approximately 1,580 kWh/kWp per year. 3. Guinea implements policies in 2/8 categories tracked by Climatescope; Renewable energy target and Tax incentives The average electricity price in Guinea has decreased from \$156. Since 2019, the average electricity price in Guinea has fluctuated between. Guinea receives an average of 2,975 hours of sunshine per year, averaging around 9 hours of sunshine per day. This article explores the drivers behind this shift, its impact on households and businesses, and how companies like EK SOLAR are supporting the transition with affordable solutions. The Guinean government has announced a long-term energy strategy focusing on renewable sources of electricity including solar and hydroelectric as a way to promote environmentally friendly development, reduce budget reliance on imported fuel, and to take advantage of Guinea's abundant water. Solar is at the forefront of this: many of the sunniest nations in the world are on the continent, and solar-power generation in West Africa as a share of all renewables has increased rapidly over the past decade (see figure 1).
