Overview

What is a PID-resistant solar module?

Built with a durable aluminum frame, tempered dual-glass layers, and designed to withstand wind loads up to 2400 Pa and snow loads up to 5400 Pa, this solar module performs reliably across harsh Indian climates. Photovoltaic glass (PV glass) is a technology that enables the conversion of light into electricity. To do so, the glass incorporates transparent semiconductor-based photovoltaic cells, which are also known as solar cells. The cells are sandwiched between two sheets of glass. When evaluating solar panels, three factors dominate: efficiency retention, weather resistance, and warranty coverage. 2 mm solar glass climbed CNY 2 to CNY 22.
