

Swiss solar lighting system installation

12.8V6Ah

Nominal voltage (V):12.8
Nominal capacity (ah):6
Rated energy (WH):76.8
Maximum charging voltage (V):14.6
Maximum charging current (a):6
Floating charge voltage (V):13.6~13.8
Maximum continuous discharge current (a):10
Maximum peak discharge current @10 seconds (a):20
Maximum load power (W):100
Discharge cut-off voltage (V):10.8
Charging temperature (°C):0~+50
Discharge temperature (°C): -20~+60
Working humidity: <95% R.H (non condensing)
Number of cycles (25 °C, 0.5c, 100%dod): >2000
Cell combination mode: 32700-4s1p
Terminal specification: T2 (6.3mm)
Protection grade: IP65
Overall dimension (mm):90*70*107mm
Reference weight (kg):0.7
Certification: un38.3/msds

Overview

In this guide, we will walk you through the step-by-step process of how to install solar light at home, covering everything from selecting the right location and choosing appropriate fixtures to understanding the installation techniques and optimizing their performance. This manual contains information about the installation and safe handling of SWISS SOLAR AG photovoltaic modules: These modules are hereinafter referred to as "module," and SWISS SOLAR AG as "Swiss Solar". With energy costs rising and environmental consciousness growing, solar lighting systems provide compelling benefits: zero operating. Do you need help installing your solar power system?

Easy - we'll do it for you! We install it, you enjoy the electricity. Want your solar system installed without having to fiddle around with drills and cable ties yourself?

No problem - we'll take care of it. Collect and convert Solar modules collect sunlight and use it to produce direct current. The orientation angle of the solar panel surface must be calculated according to the latitude of the area of installation, and solar panels must not be shaded during the hours of 9 am.
