

# What should I add to photovoltaic solar panels

## Overview

---

Adding between five and ten panels is usually enough to cover increased electricity usage, but it ultimately depends on how your usage has changed. You may not know where to begin if you think you need more solar. If there's enough available installation space, the cost of adding extra panels may be beneficial to maximize. To enhance the efficiency and performance of photovoltaic solar panels, consider the following elements: 1. Optimizers and Inverters for Improved Energy Conversion, 2. Tracking Systems that Adjust to Sunlight, 4. But you'll also want to talk to your solar installer about expanding your system. In this article, we will guide you through the process of adding.
