

What should I do if my company installs photovoltaic panels

Overview

So the company that installed your panels no longer exists. What should you do if you have an issue?

Here are the four steps you should take as soon as possible. Call local solar companies or electricians to finish or repair the installation. Many factors can drive a company to go out of business, and depending on your situation, you can take a few steps to ensure their closing does not mess with your solar access. Avoid choosing a solar installer that is likely to close by choosing one that has been in business for five years, sells. Installing solar panels can dramatically decrease your operating expenses by helping to reduce the amount of electricity you purchase from the local utility. In this guide, we're providing you with everything you need to know about solar for your business or organization, outlining the entire process step-by-step. Your first step should be to get organized and collect all the paperwork you've received from the installer including your proposal, contract, correspondence (including texts), and related paperwork from.
