

What will be the price of photovoltaic panels in 2025

Overview

In 2025, solar cell prices for residential users range from \$2.80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation. Thus, a 6 kW solar cell system can cost between \$16,800 and \$22,800 even before. This guide will brief you on what is the actual photovoltaic panels price in 2025 for households or business uses. So, what are we paying for when we invest in solar?

The total solar panel pricing in 2025 is not just the price of the panels alone. It is the combination of both hard and soft costs. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.
