

Will the solar battery cabinet be a sodium battery

Overview

In 2022, Bluetti announced a sodium ion solar battery for home use that is not yet available for sale, but is worth keeping an eye out for. Considering sodium ion batteries are not yet widespread, existing lithium ion solar batteries on the market are still great options for energy. At the moment, lithium ion (Li-ion) is the top choice for solar batteries, as this type is very reliable and can be found in leading battery storage products, including the Tesla Powerwall, Generac PWRcell, and LG Chem. However, sodium ion batteries are a promising technology, because they will be. As the renewable energy market experiences significant growth, sodium-ion batteries (SiBs) are emerging as a promising energy storage solution technology addressing challenges with excess energy production, peak usage management, & more. Its internal structure is similar to that of a lithium-ion battery, which is why it is often compared to lithium-ion batteries.
